WANDERLUST

Problem Statement:

The covid 19 pandemic significantly impacted the travel industry, leading to layoffs and impacting economies, livelihoods, public services and opportunities on all continents. All parts of its vast value chain have been affected.

Covid 19 lockdown took a mental toll in each and everyone's life. It brought a sense of fear and anxiety, leading to short-term and long-term psychosocial and mental health implications for children and adults.

'Revenge travel': because the home was not where the heart is after months of anxiety, working from home, doing or conducting classes online, and being unable to meet even close relatives, people have masked up, got their jabs and wasted no time in heading outdoors.

Post covid travels made people want to travel twice as much as they did previously, but with a lot of fear and restrictions.

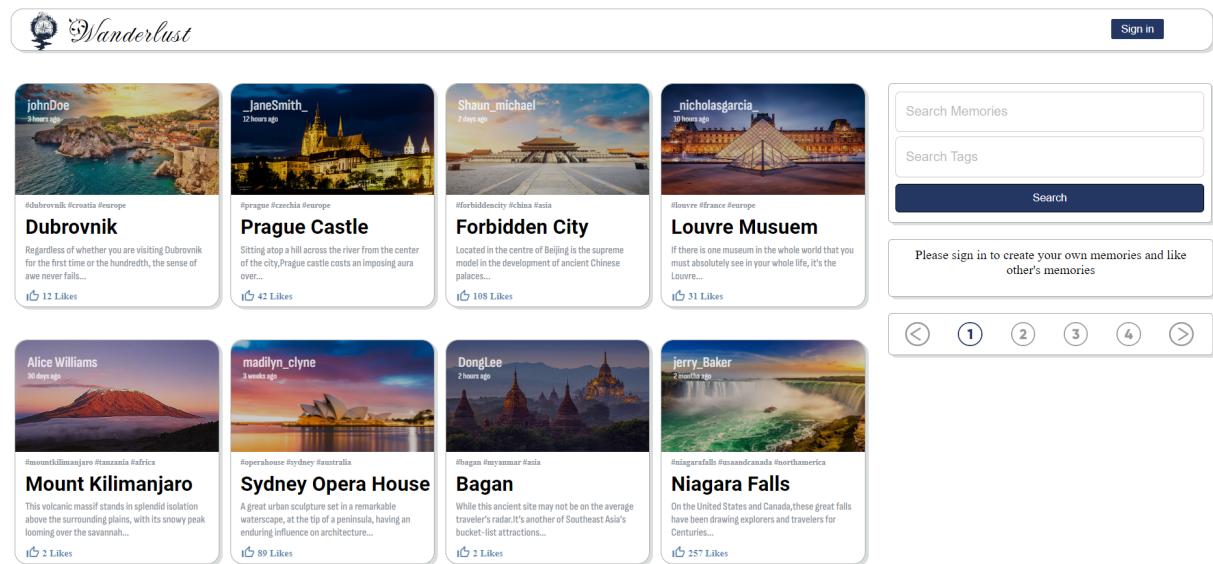

Here is '**Wanderlust**' -a social media application where people post their experiences on post covid traveling, giving insights, details, and risks posed to traveling places.

Objectives:

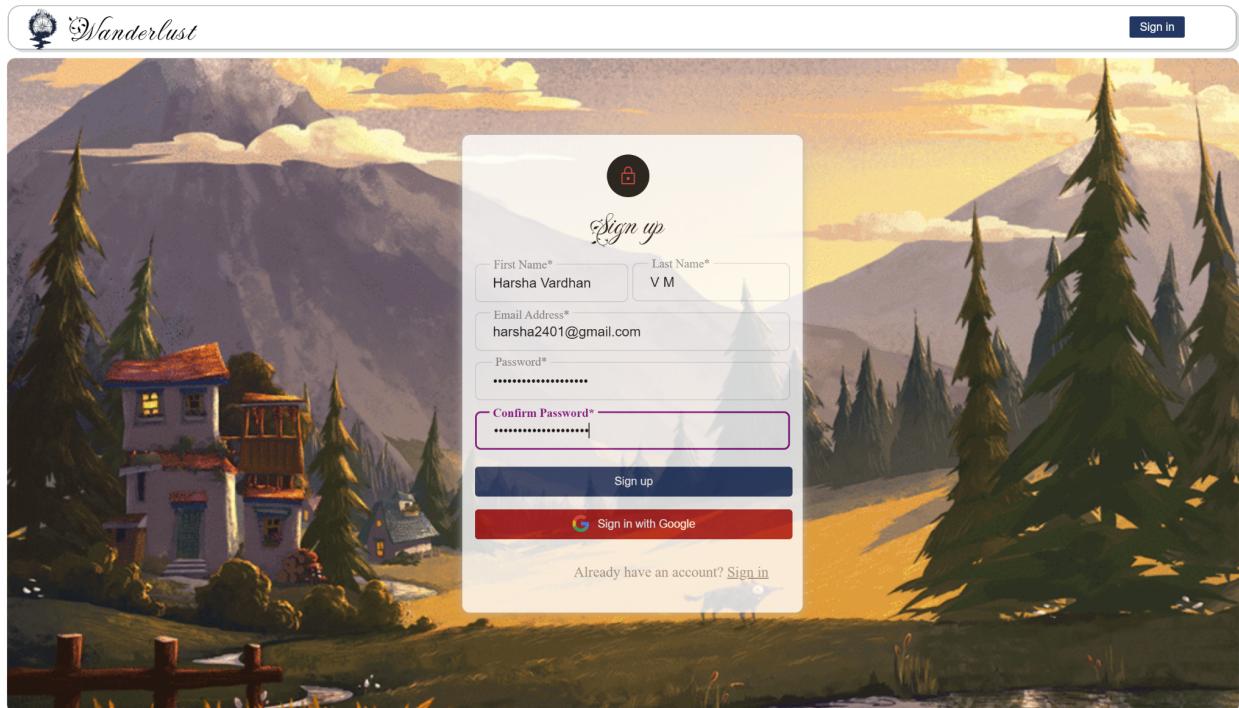

1. This application aims to help people traveling post covid to a specific place understand what is needed and the restrictions to a safe journey. The application will help them prepare the necessary documents that they need to carry with them.
2. The application allows people to talk about their post covid travel experience, the sites to be visited in that place, the food to be tried, and so much more. People can also comment on other people's posts.
3. It gives all the necessary insights into traveling to places post covid and also the sites and food of that place.

Screenshot: Home after Sign up/Sign in:

A screenshot of the Wanderlust home page. The top navigation bar includes the "Wanderlust" logo, a user profile for "johnDoe", and a "Logout" button. The main content area displays a grid of travel memories from various users. Each memory card includes a thumbnail image, the user's name, the posting time, a brief description, like count, and a delete button. To the right of the memory grid is a sidebar with search and creation tools. The sidebar features "Search Memories" and "Search Tags" input fields, a "Search" button, and a "Creating a Memory" section with fields for "Title", "Message", and "Tags". It also includes a file upload field ("Choose file"), a "Submit" button, and a "Clear" button. At the bottom of the sidebar is a navigation bar with numbered arrows (1, 2, 3, 4).

Dubrovnik

#dubrovnik #croatia #europe

Regardless of whether you are travelling to Dubrovnik for the first time or the hundredth, the sense of awe never fails to descend when you set eyes on the beauty of the old town.

Comments

JaneSmith_ : I have been there last year. The best experience ever.
DongLee : I agree with JS, Dubrovnik is breathtaking!
